MISCELLANY

Outgoing Sheriff Carl Black received a plaque from Milam Farm Bureau at the group's annual convention Thursday night for more than 30 years service to Milam Countians. His daughter accompanied the Sheriff, who obviously relished the acknowledgement of all those years as a law officer.

Quite a number of men in the crowd of 300 stood in respect to this man. Nobody ever called him a quitter.

NOW-NOW-NOW

I got a brief glance at cousin Jean Larson weekend past in Milwaukee while she was working over some correspondence between trips to San Francisco and Boston returning through Philadelphia. She is president-elect of Pilots International and an executive of Roa Films, Inc., subsidiary of the Milwaukee Journal. Jet lag was not yet apparent, but if she keeps that up, she is going to meet herself at mid-continent in a

time zone change.

I got out of the way and went to Chicago, Northern Indiana, and Michigan.

NOW-NOW-NOW

Rockdale held its first October fair and pre-fair publicity indicates a lot of things were going on, including horse racing.

That's a sport and a welcome addition to events conducted in Milam County.

I imagine the crowds were good.

NOW-NOW-NOW

It won't be long until work will begin on foundation for the new Youth Exposition Bldg. in Cameron, funding for which now totals something over \$62,000.

Some fundraisers are still working and the goal is well within range, if indeed it won't be considerably over-subscribed.

This center will provide facilities for a broad range of activity throughout the Milam sector.

CAMPAIGNERS FOR FORD - University of Texas students, driving a colorful Ford - Dole van, stopped in Cameron for visits and distribution of literature and bumper stickers for the Republican

presidential and vice presidential candidates. They were making the rounds of rural towns in the state drumming up interest in their candidates.

Expo Fund Has \$62,000 In Kitty

The fund drive for the Milam County Youth Exposition Building has reached \$62,000, \$3,000 short of its \$65,000 goal, according to fund drive treasurer Brenda Hoelscher.

Latest contributions and pledges were made by:

Clifford Cason & Assoc. of Waco, R. O. Currey, Mr. and Mrs. J. D. Moore, Dr. Pepper, Lawrence Zolt, Dr. W. R. Newton, Mr. and Mrs. Ed Cauley, Cameron History Club, Barbara's Beauty Salon, Bush Construction Co., Mary Jean Edmonds, Lou-thell Don.

Cliff's Auto Service, Barbara and Richard Burke, Mrs. Linda Puckett, Mrs. Janice Swope, Mrs. Marilee Thweatt, Mr. and Mrs. Steve Basonic, C. W. Hudson TV & Appliances, Knights of Columbus.

Style Home Furniture, Ellen F. Crenan, Rev. H. M. Bowley, Lone Star Gas, Rev. Darryl Proffitt, Fletcher Exxon Service Station, Precision Automotive Grinding, Rick W. Mortimer Jr., Steven T. Small.

Ponderosa Restaurant, Royal Seating, Cameron Compress, Mr. and Mrs. Pete Mikula, Graham McLerran, Corbin's Texaco, Mr. and Mrs. Milton Falkner, Billy Shelander, H. E. McAtee, Ed Magre.

Milam-Areans

Highway Gets Bleached

SOMERVILLE

State Highway 36 got a bleach job Sunday when a truck-tractor rig overturned 1.3 miles south of Somerville. The truck struck the Santa Fe underpass abutment, blocking traffic for several hours. The top half of the van was sheared off and bleach was spilled along the highway.

'Skywatch' Fighting Crime

FORT HOOD

Operation Skywatch, the use of a searchlight-equipped helicopter by military police for night patrols, appears to have contributed to a decrease in crime at Fort Hood. S. Sgt. Frank Till, of the crime prevention division of the III Corps Provost Marshal's office says crimes of violence at Fort Hood are down 46 percent from last year.

Horse Racing Returns

ROCKDALE

Fair Park's half-mile track echoed the sounds of the "sport of kings" over the weekend as horse racing returned to Rockdale for the first time since 1954. The races were part of a gala fair put on at Fair Park which included livestock shows, food booths, arts and crafts, and a variety of interesting exhibits.

'Little Chicago' Tag Unwanted

KILLEEN

In an effort to improve the business climate of downtown Killeen, local businessmen formed a coordinating committee to plan ways of attracting new business and to lobby the state legislature for stricter penalties against prostitution. Other cities have referred to Killeen as "Little Chicago," it was noted, and this has caused many businesses not to locate in Killeen.

Exemption Vote Fails

BELTON

A motion to raise the tax exemption for those over 65 from \$3,000 to \$6,000 failed by a four to two vote of the Belton school board at its October meeting. Board chairman Odell Geer agreed that the proposal was good and he feels that after the school's bond issue is passed and the tax readjusted "we will have to consider some kind of tax adjustment for them."

Eagle Sculpture Dedicated

ROSEBUD

An all-metal sculpture representing mountains, prairies, rolling hills, and the American Eagle in flight was dedicated in Rosebud by Cong. W. R. Poage last Monday. The sculpture is an 18-foot high work of art that depicts the eagle in flight. The artist, Larry Spivey, a native of Rosebud, explained that "I like to think of it as an 18-foot prayer."

Clinic Plans Expansion

TEMPLE

King's Daughters Clinic plans to build an addition to the present facility that will increase its size by one-third. Construction will begin early in 1977 and will be completed by next fall. The new addition will join the present facility at the west end, and will be built to take care of "overwhelming numbers" of new patients.

Alcoa First For Hearing On Mining Permit

The first hearing on an application for a surface mining operation permit in Texas was held at 10:30 a.m. Nov. 23 in Rockdale by the Railroad Commission.

Aluminum Company of America's (Alcoa) existing Milam County lignite operation at Sandow six miles southwest of Rockdale was the subject of the Surface Mining Division hearing in the Community Room of the Rockdale State Bank.

Alcoa was the first applicant to seek a surface mining permit in compliance with the Texas Surface Mining and Reclamation Act, adopted by the last session of the Legislature.

Alcoa proposes to continue extracting lignite for use as a fuel to fire boilers used for electrical power generation in the smelting of aluminum.

Alcoa's application notes that a lignite seam with an average thickness of 12 feet will be mined over some 770 acres.

CETA Grant

For County To Help Unemployed

Milam County Judge, O. B. Harden, announced that the Central Texas Manpower Consortium Title I Grant under the Comprehensive Employment and Training Act has been approved by the United States Department of Labor.

The fiscal year 1977 totals \$1,048,614 for the seven counties of the Central Texas region which includes Bell, Coryell, Lampasas, Hamilton, Milam, Mills, and San Saba.

Milam County's share of this total will be approximately \$135,271. These monies are used to assist disadvantaged, unemployed persons find permanent full-time employment by providing work experience, training and educational advancement.

Additional information can be obtained at the Milam County Manpower office located at Milam County Courthouse, in Cameron, or by calling 817-697-6894.

Absentee Voting Brisk In County

Absentee voting in Milam County is running a little above average, according to Wayne B. Wieser, county clerk.

A total of 150 ballots were mailed out on request and some 42 have voted in person, Wieser said.

Absentee voting in the November 2 presidential election closes October 29.

Lone Star Gas Files For Rate Increase

Lone Star Gas Company's local manager, Grady Allen, has filed an application for a rate increase to provide the company an 8 percent rate of return in Cameron.

Allen said Lone Star's distribution system serving Cameron earned a 4.62 percent rate of return in 1975 and that \$38,042 is required to correct the utility's revenue deficiency. He explained that Lone Star has experience increased costs of

operation due to the current inflation, and unrecovered costs of purchased gas which substantially eroded utility earnings.

The company's application would raise the average residential customer's bill about \$1.87 per month, based on 8 Mcf (thousand cubic feet) consumption.

In June of last year, the Railroad Commission authorized Lone Star to recover 85 percent of its increase in the average cost of gas (above a base of .72 cents) from residential and commercial deliveries at the city gate. During the fourteen months ended August, 1976, Lone Star had unrecovered gas costs of \$14.2 million for gas delivered at the city gate for residential and commercial customers.

"These costs result from the rapidly rising gas prices during the last few years. For example, our average cost of gas climbed from 18¢ per thousand cubic feet in 1971 to \$1.03 in June of this year, a 472 percent increase. Utility earnings declined from \$23.3 million in 1971 to \$13.1 million in 1975, or 44 percent," Allen said.

Date Changed For Mall Movies

The Cameron Chamber of Commerce corrected the date for Halloween movies to be shown on the mall from October 30 to October 28. This will be Thursday, starting at dusk.

Some of the downtown businesses will be open for shopping while the kids enjoy the cartoon "Wylie Coyote and the Roadrunner," to be shown along with a full-length feature, "Mad Magician."

Cold drinks and popcorn will be available.

'Doomwatch' Warning Comes As Man Mismanages Environment

PARIS
Reuter - The world must watch out. Man is mismanaging both land and sea and within a decade could have done hugely expensive damage to the environment.

The doomwatch warning comes from a man who should know and has a global grasp of all the worst pollution problems -- the head of the United Nations environment program.

Dr. Mostafa Tolba, an Egyptian microbiologist who succeeded Maurice Strong as head of the organization this year, said during a visit here: "I am not a pessimist by nature and I don't want to sound alarmist. But time is short. Unless we do something, and do it quickly to stop further degradation, it will be very costly to meet the requirements of the next 10 years."

Dr. Tolba, a stocky scientist who speaks concisely and deliberately, then sounded four alarm bells -- on chemicals, seas, the ozone layer and soil erosion -- and the world should sit up and listen to the alarms, he said.

The Seveso Plant disaster in Italy highlighted chemical dangers and Dr. Tolba noted: "More than 1,000 new chemicals are being thrown onto the market every year."

He said it was often impossible to gauge what effect the mixture of two

chemicals on humans, animals and plants had been and asked: "Do we really know what is safe limit to exposure over 20 years?"

"This issue requires us to be very careful with safety standards and very stringent regulations must be set by governments to ensure we are not stepping into the unknown," he said.

The picture Dr. Tolba paints of the world's seas is a depressing one and a marine rescue operation is clearly high on the U. N. body's list of priorities.

"The Mediterranean is a sick sea. It's not dead," he said. The Persian Gulf was "in a miserable state with all the pollution by oil and minerals from the oil producing countries." "The Red Sea is in the same state. The Caribbean faces similar problems as do the west coast of Africa and the Malacca Straits."

"We want to halt the process of deterioration and ensure that countries around these regional seas continue to develop without causing any damage to the sea and its environment."

On the ozone layer, the thin and fragile strip that surrounds the earth's atmosphere, Dr. Tolba cites two potential problems.

"With the Concorde supersonic airliner's planned flights and present flying heights, there is no critical

risk to the ozone layer. But if they increase the height of flying, then the ozone layer could be damaged.

"Nitrogen fertilizers might also be harmful to the ozone layer, highlighting the dilemma between the desire to produce more food and the problem of unbalancing the atmosphere."

To the U. N. chief, soil loss is a problem that he would put at least on a par with the damage from industrial pollutants. The developing world, he said, is losing land by overworking it.

"Wind and water take over and then it is eroded," he said.

Concrete examples were tropical forests felled for easily available energy resources and the tendency of nomads and villagers to overgraze on fragile vegetation. That, in the latest scientific jargon, produces "desertification."

Summing up the program's role as a kind of 21st century prophet he concluded: "We consider ourselves the only U. N. organization which is concerned mainly with the future."

"We feel that if we take the proper decisions today, then humanity will be saved too many problems. Our responsibility is to ring alarm bells for the future. Governments must cooperate and environmental conventions must be ratified."

A Cautious Campaign...

If the real domestic issues are the economy and jobs instead of one side trashing another, the indicators are mixed for the people who vote.

Inflation eased one-tenth of a percent, but buying power of an average worker dropped five-tenths of a percent.

It meant to President Ford and challenger Jimmy Carter different things as the campaign closed into its last two weeks.

Chip Carter was in Dallas two weeks ago just ahead of President Ford's visit to the State Fair. And the young Carter said the state of the economy would decide the campaign.

This well could be true. Pending a decision on the impact of the third Ford - Carter debate, polls showed Ford won by a plurality on the domestic debate, Carter by the Ford gaffe on Eastern Europe the foreign policy - defense debate. The third was a composite of issues.

Those who vote in what is termed a year of voter apathy are concerned about the

economics of the Ford Administration and the implications of a major federal priming of the economy under Carter.

The near 8 percent unemployment factor won't go away, but the cost of shrinking it to 3 or 4 percent at the national level would produce inflation as well as jobs.

Closeness of the polls indicate neither candidate is going much beyond the premises of party platform, either is working on the miscues of his opposite, neither has ignited some spark of response to break open the footrace on the downside.

Economic indicators are holding, which is a plus for Ford, but wavering when it comes to any further jobless reduction, a plus for Carter.

It seems both sides are looking for the unexpected event to exploit while doing all those things candidates do to win a national election.

Economic news provides little encouragement for a breakout. It backgrounds an incredibly cautious campaign.

U. S. Sweeps Nobels...

Saul Bellow's Nobel Prize for literature made it a sweep for American laureates in the annual Swedish awards.

No nation has ever won all of them in one year: economics, medicine, physics, chemistry and literature.

Bellow, 61, is the author of "Humboldt's Gift" and "Mr. Sammler's Planet." He is said to have been runner-up last year.

He joins six other Americans who will receive their Nobels in Stockholm December 10, 80th anniversary of the death of Alfred Nobel, the Swede who invented dynamite.

No Peace Prize was awarded this year.

These events dramatize the maturity of American letters. Writers, statesmen

and scientists have won numerous Nobels in international competition this century.

But winning all five categories is a monumental accolade exceeded only by the fact that Americans have won or shared the prize every year in the physics competition.

It is also a sign the nation is attaining an intellectual status once held by Germany in the 19th and early 20th century before World War II. It suggests the billions poured into higher education and research, always forerunners of a new level or different direction, are producing the calibre of academia equal to historic resources of this continent.

It is also good news for a nation looking for new confidence in its Bicentennial.

Oceans: Our Continuing Frontier

Exploration Of The Sea

By Sir Edward Bullard

Editor's Note: This is the fifth of 16 articles in the series "Oceans: Our Continuing Frontier." In this article, Sir Edward Bullard discusses the motives and methods of those explorers who sought knowledge of the oceans themselves rather than of the lands that lay beyond the oceans. Dr. Bullard is Professor of Geophysics at the Institute of Geophysics and Planetary Physics, University of California, San Diego. These articles, which explore the whole range of human involvement with the sea, were written for Courses by Newspaper, a program developed by University Extension, University of California, San Diego, and funded by a grant from the National Endowment for the Humanities.

Copyright 1976 by the Regents of the University of California.

The great age of global exploration began in the late 15th century.

Columbus, Magellan, and Cook were seeking and finding new oceans, lands, and people. For them the sea was only a highway. They needed practical knowledge about the sea, but they were not scientists, interested in it for its own sake.

Science in the modern sense, the systematic study of the world about us for intellectual satisfaction and for practical ends, starts in the 17th century. Many of the pioneers of the "new learning" were interested in the sea.

For example, in 1667 the Royal Society of London produced a set of questions addressed to mariners, and Robert Boyle wrote about "the saltness of the sea," "the temperature of the submarine regions," and "the bottom of the sea." In 1698 the astronomer Edmund Halley took command of a ship and sailed down to the Antarctic ice in search of knowledge of the behavior of the compass at sea. So far as I know, he had never before been out of sight of land.

The results of all this scientific effort were less than spectacular. The sea was too large. The vision of great projects was there, but not the men, the means, or the funds.

CHALLENGER EXPEDITION

The start of "modern" oceanography is usually considered somewhat arbitrarily, to be the Challenger expedition of 1872. H.M.S. Challenger was a wooden corvette of 2,306 tons, a big ship even by modern oceanographic standards. She was normally propelled by sail but also had coal-burning steam engines which gave her more freedom of maneuver. She returned in 1876, having travelled 69,000 nautical miles and gone around the world.

The object of the expedition was primarily to extend our knowledge of the animals and plants that live in the sea, particularly those living at great depths. It was thought that primitive forms might survive in the deep sea and might throw light on the early history of life. This hunch proved to be untrue.

An immense number of specimens

was collected, not only of living things but also of the waters of the oceans and from the sea floor. The results of the expedition, published over the next 20 years in 50 large volumes, were of enormous interest. Like all original and productive scientific work, they raised more questions than they answered.

WANING INTEREST

It might have been expected that this splendid start would have been followed up by other great enterprises. Interest in the deep oceans, or perhaps funds for its pursuit, died away, and oceanography relapsed into the work of small marine biological stations, many of which were founded around the turn of the century.

The biologists were interested in important problems concerning the life and fisheries in the shallow waters of the continental shelf - but the deep sea lay all unexplored, outside their reach.

It is an exaggeration to say that nothing was done in the deep sea between the Challenger expedition and World War II. There were great expeditions, particularly those of the German Meteor in the Atlantic and the British Discovery in the Antarctic both starting in 1925. However, the continuous, well-supported effort that was needed to make a real impression on the immense technical and conceptual problems was lacking.

The change came from the experience of the war. The effect of war was two-fold: the navy found that it knew next to nothing about the sea, and the scientists who worked with the sailors found that science need not be the poor relation of industry and the armed forces.

NEW PEOPLE, NEW METHODS

The combination of a demonstrated need for scientific information by the navy and a new outlook, particularly among the physicists, led to a wide-ranging effort to understand the oceans in all their aspects. Biology was no longer the center; it had been less neglected and was of less concern to those who had newly learned the art of charming money and ships from the federal government. The new men, Maurice Ewing, Harry Hess, Roger Revelle, and the rest, were not biologists; they were physicists, geologists, and chemists.

Exciting things started to happen. Before oceanography could develop far, however, new methods of observation and measurement were needed. Underwater cameras were devised that could be used in the greatest depths, and accurate echo sounders were made, using the recorders employed by newspapers to receive pictures from distant places. Instruments were now available that were capable of making continuous measurements of the change of temperature with depth.

A few years showed an enormous change in almost every tool of the oceanographer and the development of many new ones. Many once difficult operations became routine: for example, taking cores from the ocean floor; dredging rocks from the bottom; and measuring the flow of heat from the interior of the earth into the sea.

Scientists used floats that would stay at a chosen depth and signal

the motion of the water as they drifted with it; they simulated earthquakes by explosions and used them to study the earth beneath the sea; and they measured the salinity of sea water without bringing up a sample.

These new methods have been used in all the oceans with ever-increasing detail and in ships of increasing size. The typical oceanographic ship of the 1950s had less than half the displacement of the Challenger. Now we are back to about her size, which has proved best. Russian ships are much bigger, but this is a doubtful advantage since it requires many different groups to share the ship and easily leads to ponderous and inflexible planning.

DEEP-DIVING CRAFT

The great advances in oceanography have been made with underwater instruments and underwater collecting devices, not by sending men deep into the sea. However, there has been a vigorous and very expensive study of a variety of diving devices. The simplest is the SCUBA, developed during World War II, which frees a diver from the ponderous diving suit and air hose needed previously. Independent of his parent ship, the diver now swims freely, carrying his own air supply.

It is a wonderful way of studying the shallow seas but, alas, it cannot be used in the great depths of the ocean. There the diver must be protected from the pressure of the water by a deep-diving submarine. A considerable variety of such vehicles has been built.

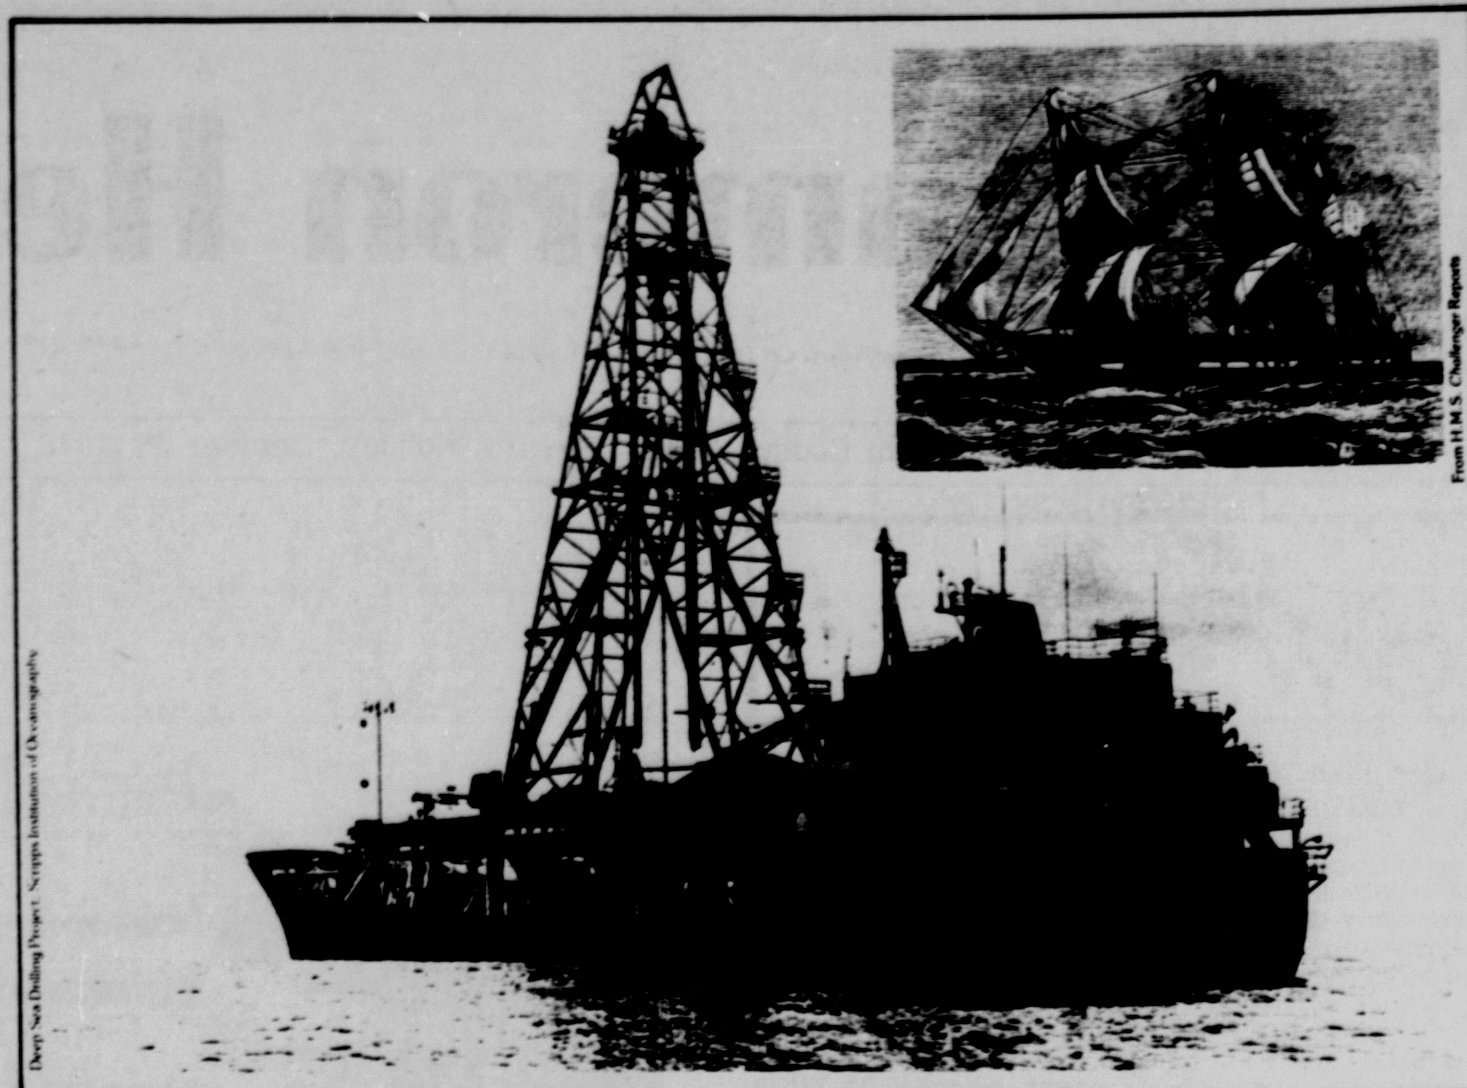

There have been important achievements with some of these craft, such as the recovery of the H-bomb accidentally dropped off the coast of Spain in 1966 and the examination of the wreck of the submarine Thresher in 1963. They have, however, contributed little to our knowledge of the deep sea. They are expensive and time-consuming to operate, and they can do little that cannot be done as well without a man in the sea.

The initial enthusiasm for manned vehicles has declined, and it now seems likely that their main applications will be to the inspection, adjustment, and repair of underwater engineering structures, such as wellheads and pipelines.

Recently the U.S. Deep-Sea Drilling Project has drilled several hundred holes in the oceans of the world, some to depths of several thousand feet beneath the bottom. The results, to be discussed in the next article, are giving a new view of what lies beneath the ocean floor and of the history of the oceans themselves.

COURSES BY NEWSPAPER is distributed by the National Newspaper Association. The views expressed in this series are those of the authors only and do not necessarily reflect those of the University of California, the National Endowment for the Humanities, the distributing agency, or of the participating newspapers and colleges.

NEXT WEEK: Sir Edward Bullard explains how our new knowledge of the oceans has given us a "New World Picture."

H.M.S. CHALLENGER, 1872 AND GLOMAR CHALLENGER, 1975. The expedition of H.M.S. Challenger in 1872 marked the beginning of modern oceanography. Its modern namesake carries on the work of exploring the ocean, drilling hundreds of holes in the ocean floor.

CANDIDATE'S WIFE VISITS - Mrs. Jack Burgess, whose husband is a candidate for congressman for the 11th District, visited in Cameron Thursday, including a stop at The

Herald and at St. Edward Hospital. Administrator Sister Pauline is shown here with Mrs. Burgess before taking her on a tour of the hospital.

Loy Burgess Stumps For Candidate Husband

Loy Burgess is an optimist.

Wife of GOP congressional candidate Jack Burgess, she is asking about schools in the District of Columbia for five daughters, 5 through 16.

She is campaigning for her husband the last two weeks in the 11th Congressional Dist. And she met with some Republican ladies here Thursday for lunch.

Burgess, a Waco businessman, is running in the general election against Cong. W. R. Poage, Democrat of Waco, who is seeking re-election for his 20th term.

Mrs. Burgess says she believes the people of the 11th Congressional Dist. are saying they want a change. She is stumping the area for support, for the distaff-

side exposure of Burgess' candidacy.

She talks about there "being too many lawyers in Congress," that "it is nothing against Bob Poage," but that "maybe it's time to send a 40-year-old or younger man to Congress."

While husband Jack finished a business major at Texas Tech and a master's at Pennsylvania's Wharton School of Finance, she elected to marry after two years studying architecture at Texas Tech, where she met her husband.

She has spent most of the last 18 years taking care of daughters Kathy, the oldest, and Paige, Ashley, Leslie and Laura, at 5 the youngest.

But training she and her husband took at a Washington Republican Congress-

al candidates' workshop encouraged her to campaign the last few weeks of the campaign.

She is a native of Dallas. Jack Burgess is a native of Waco, an independent businessman and civic leader who has grown up there, she says.

Earlier comments to the press suggest she sees the woman's place less visible than her husband, but campaign experience already suggests she is finding a new compatibility with career competition by going out in her husband's behalf.

Geographically, the 11th Congressional Dist. is enormous. And Loy Burgess says she is confirming that the election in November may surprise a lot of people.

Conservative by nature, she thinks a woman could

not be a good congressman.

She couches a lot of her comments in religious perspective: "One day the Lord showed me that He had been preparing Jack for this for 15 years. He reminded me of things Jack had done that I had forgotten. I believe he is totally qualified to be a congressman and a really good congressman."

She says husband Jack wants to serve 11th Congressional Dist. the best he can and to make that contribution within a limited number of terms, if elected.

Like so many homemakers, Loy Burgess may be finding the challenges of career, of a brief skirmish in politics a new way of life. Dorothy Hamill hairstyle and all.

State Beauty Council Sets Regional Meet

The Beautify Texas Council will hold a one-day regional meeting in College Station on Friday, November 5 in the Texas A&M Memorial Student Center.

The meeting is open to all interested city officials and local citizens in the 43-county area, which includes Milam.

Mrs. Dorothy Holland of College Station, Mrs. Arthur Speck of Nacogdoches, Bill Scheibe of Chappell Hill, Henry Hauschild of Victoria, and Dr. Ewin Eads of Beaumont are the BTC District Governors in charge of the meeting.

Sen. Bentsen Calls For Tougher Sentencing Laws

Senator Lloyd Bentsen has called for tougher sentencing laws in federal courts.

Bentsen was interviewed by reporters in the Midland and Odessa area Tuesday afternoon.

"By whatever standard we use, sentencing policies in criminal cases are failing. Judges are left adrift in a sea of discretion. There are few guidelines and little direction," the Senator said.

Senator Bentsen has proposed legislation to reduce the discretion of both judges and parole boards in the sentencing of criminals by replacing the existing indeter-

minate sentencing system with a new system of "presumptive" sentencing. Besides setting minimum and maximum sentences, this approach also sets a middle or "presumptive" sentence.

Current federal law, for example, allows judges to set prison terms for bank robbery at anything from zero years to twenty years. But under the bill introduced by Bentsen, a four-year "Presumptive" sentence would be set for first offense bank robbery with virtually no eligibility for parole. If the judge goes above or below this "presumptive" sentence, he would

have to present his reasons for doing so in writing, subject to appellate review.

"Certainty of punishment tougher sentencing laws, can provide a deterrent to many forms of violent criminal behavior. The sad state of events today leads many to believe that the probability of punishment is low, that the law need not be feared, that criminal conduct will be tolerated with little or no cost to the criminal," Bentsen said.

"We should work toward a system of criminal sentencing that is, as John Greenleaf Whittier once described justice, 'The hope of all who suffer, the dread of all who wrong.' The 'presumptive' sentencing legislation I have proposed is a step toward that," Senator Bentsen said.

Reuters International News Briefs

KAULA LUMPUR

A calendar on the desk of the newly appointed chairman of Malaysia's state-owned oil company Petronas has November 15 firmly underlined. That is the date by which he is under orders to produce a settlement of negotiations on producing sharing--at present deadlocked--between the Malaysian government and foreign oil companies.

LONDON

As they count the cost to their pockets of the toughest credit squeeze in the nation's history, the mood of Britons towards their economic crisis has changed from stoicism to sharp apprehension. There is widespread doubt and concern about the future, about the ability of politicians to deal with the country's problems, and uncertainty about what it will take to satisfy overseas creditors.

PORT MORESBY

Police using helicopters claim success in a campaign to stop bloody battles in Papua-New Guinea fought by tribesmen with bows and arrows, hardwood spears and axes. During the past year alone, the fighting has involved 17,000 warriors, of whom 1,500 were arrested.

ACCRA

A huge inflation rate, aggravated by the world recession and a poor harvest, has caused an economic crisis in Ghana. The current rate of inflation is 60 to 70 percent, according to reliable sources. The budget for 1976-77, published recently, blamed the inflation on a shortage of imported consumer goods, a high growth in money supply, and stagnation in domestic production.

BANGKOK

Several days after a new military coup here, the people of Thailand are getting used to the idea of living with the ARC. ARC is the 14-man military administration reform committee which staged the coup. A supreme court judge without political experience, Thanin Kraivichien, has just been appointed prime minister.

MONTREAL

What can the International Olympic Committee learn from the lessons of the Montreal games? Was it a fantastic party with lasting benefits, or just a profligate waste? It has been described as the most successful Olympics ever held, with the biggest attendance, biggest audience, and with flawless management. But Prince Philip of Britain voiced a common complaint that the games have got too big for one venue and that they ought to be split up.

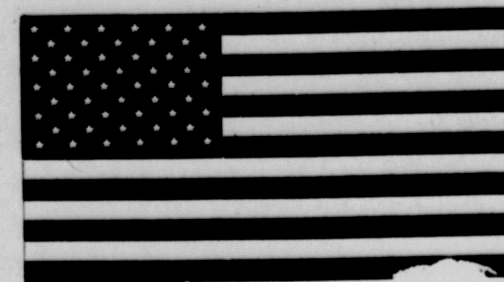

MOSCOW

When the Soviet parliament meets for a three-day session at the end of this month, more attention than usual will be focused on the main speaker. By all precedents, it should be Prime Minister Alexei Kosygin delivering the keynote address on Oct. 27 and the indications at present are that this will be the case. Nevertheless, the premier, just completing 12 years in the post, has been the subject of a flurry of reports suggesting his health may be a serious problems.

Mrs. Gerald Foshee
Recent visitors in the home of August Helper were Mr. and Mrs. John Helper and Mrs. Leon Helper of Robstown; Mrs. Ruth West and daughter of Riveria; Mr. and Mrs. Albert Helper of Dallas; and Sister Mary Barbara of Houston.

Father Ray Widacki of Brenham, Mr. and Mrs. Frank Jahn, Mr. and Mrs. Leo Helper, and Mr. and Mrs. Eugene Halfman visited Mr. and Mrs. Paul Olbrich last week.

Mr. and Mrs. Billy Ray Benesh and Mr. and Mrs. Gerald Foshee visited Mr. and Mrs. Thomas Polk, Darrell, and Donald of Rosebud.

Mr. and Mrs. Guy Davis and family and Mr. and Mrs. Ralph Brooks and family of Nolanville visited Mr. and Mrs. Billy Benesh.

Mr. and Mrs. Joe Hromcik attended the RVOS meeting and supper at Marak.

Mr. and Mrs. Billy Kilpatrick and Kelli of Temple spent a weekend with Mr. and Mrs. W. G. Marek.

Jake Prescott has returned home after spending several days at Scott & White Hospital in Temple.

The next community get together will be Thursday, Nov. 4 at the Burlington Recreation Hall with Mrs. Herbert Engbrock, Mrs. Paul Olbrich, and Mrs. Leo Helper as hostesses. Supper will be served at 7:30 p.m. and all in the community are invited to attend.

Sister Mary Pauline Gregorio, administrator of St. Edward Hospital in Cameron announces a new department of physical therapy with a new physical therapist, David Flowers. Rigo Valdez is also in the physical therapy department, having been employed there for 10 years. Physical therapy can render aid to the community hospital an aid to the physician who is implementing early ambulation programs. It also aids in self-care activities before a patient becomes too dependent upon others for help. It also aids in followup after discharge from the hospital and renders a real service to the community through a provision of a wide variety of out-patient services.

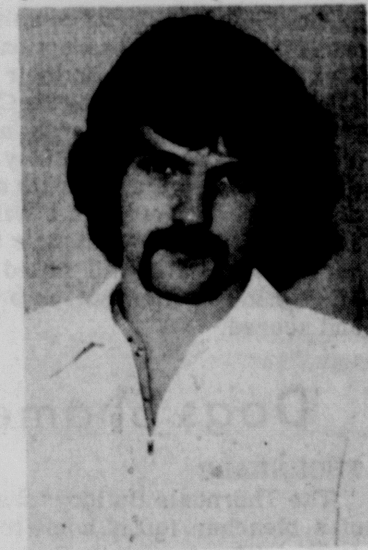

Physical therapy is an art and science dealing with the prevention, correction and alleviation of disease and injury employing manual techniques, physical agents and exercise on prescription of a physician for therapeutic and diagnostic purposes.

The physical therapy department at St. Edward Hospital can offer programs individually established on consultation after a thorough evaluation of the patient's status and potentials.

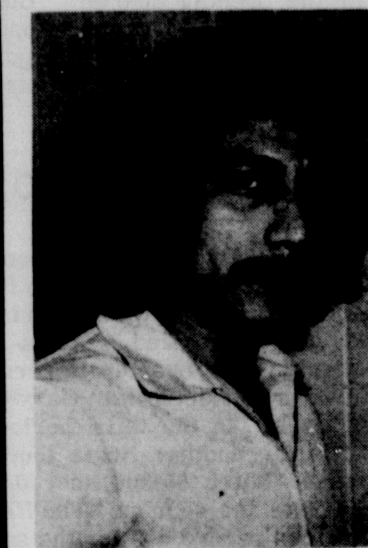

Treatments to be given by physical therapy under the direction of a medical doctor

only will be whirlpool, electrotherapy, diathermy, ultrasound, hydrocortisone iontophoresis, both active and isometric exercises, electrical stimulation, paraffin bath, deep breathing exercises, incentive spirometer, ultraviolet massage, active exercise, joint range of motion, muscle testing, EMG, and can relieve tension headaches with special treatment.

Flowers, 24, is a graduate of West Virginia University with a BS in physical therapy. He is a native of West Virginia and has worked in several hospitals across the country, including his last position as chief physical therapist at Madonna Hospital in Denison.

Gasoline Quality Due Tests

Comptroller Bob Bullock announced Tuesday that his office is initiating a pilot project to test the quality of gasoline sold at service stations in Texas.

Bullock said the Comptroller's Office has received a number of consumer complaints in recent months indicating that some service stations are selling inferior gasoline.

"We've had calls from people whose engines totally burned out a few miles down the road after filling their tanks," he said.

The Comptroller said that Articles 8601-8611, Vernon's Texas Civil Statutes, set out specific gasoline standards and empower his office to test to see that the standards are met.

Selling inferior gasoline to the public without clearly indicating its substandard quality is a misdemeanor, he added.

Bullock urged motorists who can document that their engines have been damaged by inferior gasoline to call his Motor Fuels Tax Division toll-free from anywhere in Texas at 1-800-252-5555.

The pilot project will be closely coordinated with efforts by Sen. Lloyd Doggett of Austin to strengthen the State's power to test and enforce reasonable gasoline standards, he said.

Baylor Homecoming Stirs Fever On Campus

There is a fever on the Baylor University campus, and temperatures will continue rising through Nov. 4-6. Fortunately, the fever does not mean illness, but rather an enthusiasm seen only once a year in the Waco area.

November 4-6 is Homecoming at Baylor and students, faculty, and administration are preparing for the expected return of 16,000 alumni and friends.

"We've been busier than usual this year with requests for information and tickets to the event," said Raymond Vickrey, executive director of Baylor Alumni Association. "From all indications, this will be one of the biggest and best Homecomings in our 67 year tradition."

Baylor Homecoming 1976 includes reunion dinners, op-

en houses, pep rally, bonfire, Pigskin Revue variety show, Cabaret, and the Homecoming parade, one of the largest collegiate events in the nation. More than 20 floats will be featured along with 50 Homecoming Queen nominees representing student classes, social and service clubs, and other organizations.

"We will have more than 90 units in the parade this year," said Artie Sudan, Homecoming chairman for the Baylor Chamber of Commerce, which co-sponsors Homecoming with the Alumni organization. "One of the highlights of the parade will be the appearance of many of the athletes who have been honored as members of the Baylor Hall of Fame."

Several tons of newspapers, wire, nails, and wood, and 300,000 yards of vinyl floral sheeting and fringe, as well as hours of work and imagination are going into the construction of the floats which feature themes and scenes related to the Baylor and Arkansas football titit on Saturday, Nov. 6.

One of the biggest events of Homecoming is Pigskin Revue which will be presented in Waco Hall Thursday and Friday evenings, Nov. 4-5.

The Homecoming Queen will be announced during the Thursday performance of Pigskin Revue. Pigskin Revue features the winner of All University Sing last spring. Cabaret will be highlighted by the appearance of Baylor alumni and nationally known singer, Valerie Goodall and her television star husband, Bill Mooney. They will give a dramatic presentation of John and Abigail Adams, focusing on revolutionary figures.

Homecoming reunion dinners will honor members of classes graduating in years ending in sixes and ones, beginning with the Class of

1926 and ending with those who graduated in 1971.

Climax of the nostalgic weekend will be the football contest between the Baylor Bears and the Arkansas Razorbacks Saturday at 2 p.m. at Baylor Stadium.

Sharp-Tracy Friendship

Mrs. Leroy Guillote

Engineers from Continental Co. of Lubbock are installing a new reginer and other new equipment in the Sharp Gin getting it ready for another season.

Guests of Mr. and Mrs. Nelson Davis during the weekend were her sister, Mrs. Ruth Price of San Antonio and their niece, Mrs. Richard Allen and son of Irving.

Gary Koehnke, of the Naval Air Station, Corpus Christi and Jack Spalding of the Nava 1 Air Station in Kingsville spent the weekend with Mr. and Mrs. Leroy Guillote.

Mrs. Edna Rinn visited with her nieces, Mrs. Felix Fries and Mr. and Mrs. Rudy Gold in Wiemar.

Linda Coffman of Dallas spent the week with her folks, Mr. and Mrs. Howard Coffman. They all visited with Mr. and Mrs. Freddy Coffman of San Juan.

Jerry Harbuz and Norris drove Rockdale School buses to the Dallas State Fair Saturday.

Mr. and Mrs. Robert Stevens and daughter Laura spent Tuesday and Wednesday in Eden with their parents, Mrs. Rosa Crawford and Mr. and Mrs. Frank Sessom.

Mr. and Mrs. Leroy Guillote visited with Mr. and Mrs. Clifford Walker Wednesday.

Richard and Jane Guillote of Fairfield spent a weekend with their parents and relatives in Tracy and Rockdale.

Burgess Says Farm Bill Detrimental

Jack Burgess, candidate for U. S. Congress, stated in a speech to the Lampasas Kiwanis Club on Tuesday, Oct. 20, that the Federal Farm bill passed by Congress is detrimental to the farmer and dangerous in the long run to the consumer.

The bill called for the raising of target prices and loan rates on crops of cotton, wheat, and corn; providing a loan program for soybeans; and authorizing quarterly cost of production adjustments in dairy support prices.

Burgess stated that he agreed fully with the position of the Farm Bureau in opposing this bill because it is a continuation of the old discredited farm policies which piled up surpluses and denied producers a fair return in the market place.

Burgess quoted from the Farm Bureau's report published on Oct. 4 that analyzed the Congressional voting records. "Our present Congressman voted against the Farm Bureau five out of eleven times.

And according to the report, Poage's vote against the Farm Bureau position on the Farm Bill will perpetuate the unsound target price system, cost the federal government substantial sums when deficit spending is already a threat to the economy, and deny producers a fair return, according to the Farm Bureau," Burgess said.

Burgess went on to say that the federal government can best help the farmer and rancher by eliminating excessive interference by OSHA, FEA, EPA, and other federal agencies.

"I agree with the principles of the free market system and deplore the current situation of farmers and ranchers that was created by government interference in the free market," Burgess said.

HORNET do-it-all runner #24 Melvin Williams dashes around left end. He picked up 88 yards in his running effort Friday night and 57 yards as

a receiver. The Hornets were able to move 99 yards the last 1:20 to get into field goal range to down the Cameron Yoemen 9-6. Mike Peck photo.

Tigers Have Hay-Day With Panthers

The Rockdale Tigers could have left the field before the final gun sounded and probably would have still won. The Tigers started their version of the annual Rockdale parade a little early when they shellacked district foe Pflugerville Panthers 62-0 to remain undefeated and on top of the charts in 2A football.

Tiger fullback Garry White scored twice, halfback Don Westley scored twice, tackle Mario Garza scored a touchdown a 8 PATs, Robert Lue-

tge scored once, quarterback Kerry Locklin scored once, and Insell Richards, another TD.

White opened the scoring in the first period when he rambled 55 yards to the TK. Garza booted the PAT giving the Tigers a quick 7-0 lead.

Locklin then went to the air for the second TD when he connected with Luetge from 38 yards out. Garza tapped the PAT and the Tigers gained a 14-0 lead.

Westley then broke 95 yards and Garza booted the

extra point, giving Rockdale a 21-0 lead.

Within 2 minutes the Tigers scored 21 unbelievable points. Garza, who had already scored 3 points on PATs, did what every line man would like to do - score a touchdown. His wish came true when he intercepted a pass and ran 35 yards non-stop for pay dirt. To top it off, he booted the extra point.

Field general Locklin carried the ball in from 9 yards out for the next quick Tiger TD. Garza's boot was true to the mark.

Luetge recovered a Panther fumble, giving the Tigers excellent field position and White scored his second TD of the evening when he plunged in from one yard out.

Garza again converted. It looked like at that pace the Rockdale school officials would have to add an extra digit to the scoreboard.

In the final quarter Richards scrambled 40 yards, followed by the final TD of the evening by Westley on an 84-yard run.

Hornets Upend Yoe With Field Goal, 9-6

Caldwell remains undefeated in district play after upending the Cameron Yoemen with a 23-yard field goal that sailed through the uprights giving the Hornets a shaky District 23AA 9-6 win.

The last two minutes in each half proved to be disastrous for the Yoemen when penalties boosted the Hornets to both their scores.

The winning 3 points came in the last 8 seconds of what could have been termed confusion on the part of both clubs.

What looked to be a 6-6 tie, turned out to be a very important District 23AA win for the Orange and White Hornets.

The winning field goal came after the Yoemen had pushed the Hornets to their own one yard line after a perfect 40 yard punt by Donald Komar with only 1:28 showing on the clock.

Mass confusion began for the invincible Yoe Fence. The Yoe secondary collapsed giving way to 88 yards from the passing arm of Hornet quarterback Bill Jones in 10 plays.

With the ball resting on the Yoe 16 yard line and time running out, Yoe tackle Joseph Schmidt was called for roughing the Hornet passer.

The pork was then placed on the 7 yard line and the clock was stopped with 8 seconds. Hornet kicking specialist

was called to duty on the first down play. The ball rested on the 7 and the kick came from the 13. Carroll's boot sailed straight through

the cross bars and with only 3 seconds showing the Hornets did the impossible.

A golden opportunity for the Yoemen failed to produce

any points prior to the winning drive for the Hornets.

Greg Kelley intercepted a misguided missile with 4:07 in the fourth quarter. The Yoemen gained possession of the ball on the 44 after 15 yards were marked off for a clip by a Yoe blocker.

The Yoemen were unable to generate an offensive drive and Komar laced the punt to the one.

In the second quarter the Hornets took the lead in a similar sequence of plays.

In the first half score the Hornets drove the ball 80 yards in only 9 plays.

The Hornets took over on their own 20 with 2:19 remaining in the half. Another penalty put the Hornets on the doorstep of the Yoe goal line.

A pass interference call with 29 seconds moved the ball to the one foot line and stopped the clock.

Do-it-all runner and pass receiver Melvin Williams toted the mail from the one foot line. The 80 yard drive only took 1:54.

David Delony broke through the line on the point-after attempt and blocked the kick, giving the Hornets a 6-0 half-time lead.

The Yoemen scored on the second possession of the second half driving the pork 75 yards on the foreign turf. The drive took 12 plays and consumed 4:58 of the third quarter.

John Schmidt blasted one yard over the center Carl Bradley to put the Yoemen on the scoreboard with 2:23 remaining in the quarter.

James Thompson's PAT try was wide to the right, knocking the score 6-6.

On the ensuing kick-off the Yoemen received a break when Yoe's Mike Barr recovered a Williams fumble.

Melvin Williams led the running attack for the Orange and White, picking up 88 yards on the ground and another 57 yards as a receiver. Williams tallied 79 of the 80 yards in the final series that resulted in the Hornet field goal.

The Yoe Fence halted John Ayers, holding him to only 15 yards in 9 carries.

For the Yoemen David Rosemond had 41 yards in 10 carries and Errol Spells followed with 36 yards in 12 carries. Schmidt had 32 yards, 1 TD, in 11 carries. Kelley had 28 yards in 1 carry.

The Yoemen ran 50 plays to the Hornets 62. The Hornets ran 22 plays in the fourth quarter to the Yoemen's 9. In the final period the Hornets picked up 128 yards of offense.

The Hornets continue to be the only other undefeated district contender in District 23AA besides the top ranked Rockdale Tigers.

The Yoemen drop to 2-2 in district play and 2-4-1 for the season. The Hornets stay 4-0 in district and 5-2 for the season.

SPORTS BRIEFS

Elgin Edges Manor

ELGIN

The Elgin Wildcats contained the Manor Mustangs in District 23AA action Friday and won 14-6. The Wildcats scored on their first offensive series when quarterback Robby McClendon connected with Greg Riley for 57 yards and setting the 'Cats on the two yard line. Elroy Falke blasted across the line, giving the Wildcats a 7-0 lead. The Mustangs took advantage of a Wildcat fumble at the 15 and in 3 plays the Mustang's fullback Charles Joyner scored. The PAT failed. In the third quarter McClendon rolled out on a QB keeper for Elgin and scored.

'Dogs Shame Florence

THORNDALE

The Thorndale Bulldogs shamed Florence in front of a bleacher full of home town folks Friday night 46-0. There was little doubt what the outcome was going to be when the Bulldogs scored four times in the opening quarter. Bulldog fullback Russel Cuba dashed 43 yards to open the scoring streak. Halfback Roy Hernandez and Jeff Davis tallied the bulk of the winning yardage for the Thorndale Bulldogs.

Rogers Pops Thrall

THRALL

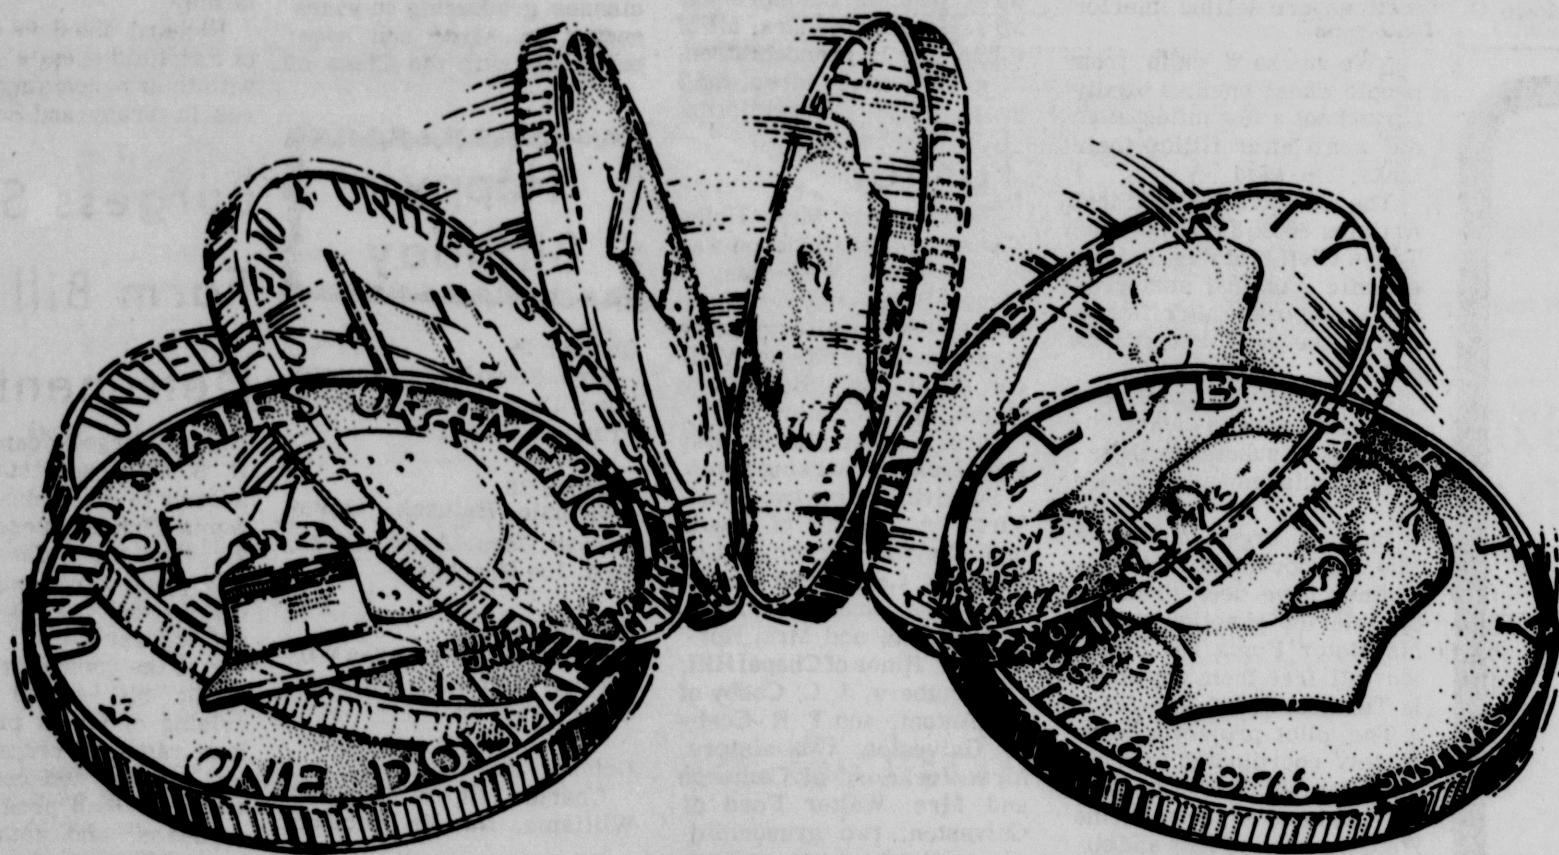

The Rogers Eagles whalloped the Thrall Tigers 26-0 in District 28A action Friday night. Rogers scored twice in the second stanza when Ricky Douglas scrambled 7 yards for the opening TD. Later in the quarter Rogers quarterback Larry Clowers connected with Gary Clowers on a 17-yard TD pass. In the third period Douglas blasted 50 yards for another Eagle touchdown. In the final quarter Mitch Mason scored from 4 yards out to complete the scoring. The Eagles increased their win-loss record 6-2 for the season.

Taylor Pounces Badgers

TAYLOR

The Taylor Ducks defeated the winless Lampasas Badgers 40-0 in District 12AAA action Friday night. It has been all bad for the Badgers as they await another Johnny Jones. In the absence of some kind of offense, Lampasas remains winless this season. The Ducks scored early when Richard Smith fell on a block punt in the Badger end zone. Marion Morgan scored from the three for the Ducks and Try Buzan took a 27 yard pass from Gary Lankford for another score.

A TWO-SIDED COIN

YOU'RE PAYING MORE FOR ELECTRICITY. IT'S COSTING US MORE TO PRODUCE IT.

Texas Power & Light Company is concerned about both sides of the coin.

You really need no reminders about your side. Electric bills are higher these days and the fact that the costs of almost everything are up doesn't reduce your concern about your cost of electricity.

But, for just a moment, take a look at TP&L's side of the coin... the higher costs of producing and supplying electricity.

From 1974 to 1975, the cost of

the fuels necessary to operate generating plants increased more than 65%.

To counter the spiraling costs of natural gas and fuel oil, TP&L is building new plants which use lower-cost lignite coal and nuclear materials. In 1975, the Company's construction costs totaled \$268 million... \$55 million more than in 1974.

Costs of operation and maintenance of generating plants, lines, trucks and other facilities

and equipment have also risen drastically in recent years and are continuing to go up.

TP&L is working to keep the price of electricity as low as possible, but as the costs of producing it go up we have no choice but to ask our customers to pay a higher price. It's the only way we can maintain the adequate supply of power and the dependable service you expect.

Little Known Facts About America's Greatness

America's great size has allowed her to be very generous with land. In colonial times even poor servants could rely on there being enough room on the land to start a farm.

Brazos Queen — Lures Tourists

Waco's Brazos Queen is living up to her billing as Central Texas' most popular tourist attraction, bringing 1200 visitors a month into Waco. Approximately 100,000 people--1/3 of these from out of town--have ridden the 104 foot red and white riverboat since it set sail under sunny skies the last weekend of August 1975.

Permanently docked at Interstate 35 and the Brazos River, the Brazos Queen is many things--an authentic replica of a turn-of-the-century paddlewheeler, a floating restaurant, a party and excursion boat.

The brainchild of Wacoan Paul F. McClinton, this unique venture is the culmination of years of creative planning. At dedication ceremonies McClinton, with well-deserved pride, called the Brazos Queen "an important investment in furthering Waco." On the same occasion, then Mayor Ted Getteman observed, "The Brazos Queen will play a key role in the industrial growth of Waco, as well as making Waco a better place to live. We all wish her well on her journey."

That journey began when McClinton contacted Wisconsin riverboat Captain John Louck, and persuaded him to move to Waco and oversee the construction of the boat. Louck had designed and built several riverboats which are in operation today on the nation's rivers. The boat was built entirely from scratch by the welding class at Texas State Technical Institute in Waco, and took 8 months.

The beauty of the Brazos River banks was the inspiration for an excursion boat.

Triumphs of Science

NEWS OF SCIENCE THAT AFFECTS OUR LIVES

More Americans are discovering that garbage can be too precious to throw away. Ingenious scientists are doing something about it by finding ways to make waste productive.

A first-of-its-kind reclamation facility, being built in Southwestern Pennsylvania, will take waste such as dust and scale from specialty steel-making mills and convert them into useful metals.

but the river itself posed two problems--its unpredictable depths and low bridges. "This boat was designed for the Brazos only," Captain Louck said. It was designed successfully.

As the boat glides past historic landmarks at a stately 6 miles per hour, Captain Felix Hargis points them out over the public address system: Fort Fisher, the Texas Ranger Hall of Fame, Waco Suspension Bridge, the restored mansion East Terrace, Cameron Park, and the new Convention Center complex.

Crowds of onlookers along the banks wave to passengers, and local fishermen hold up the day's catch as the boat passes. As a former Captain said, "There is a little Tom Sawyer and Becky Thatcher in all of us!"

The "Queen" has a 1 1/2 hour excursion cruise daily at 2:30, and reservations are not required. Rates are \$3 for adults and \$1 for children. The evening dinner cruise, at \$7.50 per person, includes a buffet dinner, tax, music, narration, and a two hour cruise. Departure time is 6:30, with additional dinner cruises offered at 8:30 on Friday and Saturday nights. The boat is closed on Mondays. Reservations can be made by telephoning 817-772-7009, or writing Brazos Queen, 4712 West Waco Dr., Waco, TX 76710.

Besides the public excursions and dinner cruises, the boat has received extensive private bookings for sales meetings, seminars, and convention groups. She is heavily booked for private parties.

Using techniques developed in the laboratories of The International Nickel Company, Inc., the resource-conservation plant is designed to process, by mid 1978, more than 40,000 tons of waste materials each year.

The major product will be a nickel-iron-chromium remelt alloy which will feed steel plants producing useful alloys such as stainless steel. Any dust generated at the multi-million-dollar facility is to be recaptured and recycled. Gases generated in the operation will be cleaned while slag from smelting operations will be used for railroad ballast.

GOLDEN WEDDING--Mr. and Mrs. J. L. Zalesky will observe their 50th wedding anniversary with a reception and open house at the Buckholts Hope Lutheran Education Building on Sunday, October 31 from 3 to 5.

Honoring their parents and grandparents will be Mr. and Mrs. Henry Vaculin and family and Mr. and Mrs. Pete Vaculin and family. Mr. and Mrs. Zalesky were married on Oct. 30, 1926.

ANNOUNCEMENT!
Effective immediately all weddings MUST be in our office not later than two weeks after the date of the marriage.
We will appreciate your cooperation on this matter.

Burtis-Vogel Exchange Vows

After a wedding trip to points in South Texas, Mr. and Mrs. Peter Stewart Vogel are making their home in Dallas where both are employed.
The couple was married September 18 in a ceremony at Highland Park in Dallas.
The bride is the daughter of Mr. and Mrs. John Burtis of Buckholts, and the groom is the son of Mr. and Mrs. Phillips Vogel of Dallas.

Halloween Dance At Caldwell

The Caldwell Chamber of Commerce will sponsor a Halloween Dance, Saturday, October 30 at the St. Mary's Gym in Caldwell. Time is 9 til midnight with the band being the Steve Long Band from Houston. Admission will be \$2.50 at the door.

"AUSPICES OF AUTUMN" will be portrayed at the Fleur-de-lis Garden Club's annual flower show scheduled for Tuesday, November 9, in the CISD home of Mr. and Mrs. Buddy R. Dulin, 902 North Jackson, Cameron. Pictured are Mrs. Douglas Buck, Mrs. Griffin Barrett and Mrs. Buddy Dulin.

PUBLIC NOTICE

Lone Star Gas Company, in accordance with Section 43(a) of Article 1446c V.A.T.C.S., hereby gives notice of the Company's intent to implement a new schedule of rates for natural gas service to be charged to the residential and commercial consumers in the

City of Cameron effective November 26, 1976.

The rate schedule is expected to furnish a 9.92 percent increase in the Company's gross revenues in the City of Cameron.

A Statement of Intent has been filed with the City of Cameron and is available for inspection at the Company's business office located at 118 N. Houston Street, Cameron, Texas

SOCIETY AND CLUBS

Business-Professional

The Cameron Business and Professional Women celebrated National Business Women's week Oct. 17-23, by sending their president, Eunice Lawrence and past president, Ruby Mosley to District VI conference held at the Ramada Inn in Austin.

The Business and Professional Women's club held their meeting at their club house Monday, Oct. 18.

Ruby Mosley gave a report on District VI conference. Eunice Lawrence gave a very enlightening report and pictures on face and age. She also gave a report on the first powered flight from 1903 to 1976 space shuttle.

Fannie Jackson gave a report and pictures on a trip west.

Guests were Mazie Price and Verna Harris. Lillian Lester was made an honorary member.

A covered dish luncheon was enjoyed by all.

Arts And Services

The October meeting of the Arts and Service League was held Thursday, October 14 at the new Buckholts State Bank. Mrs. Reeves Brown presented the program including the film "America's

Ranching Legacy" which features the sight where old ranch buildings are being restored near Texas Tech in Lubbock.

A tour of the new bank facilities followed the program.

New business included the election of two new members, Mrs. Gwen Van Clieve and Mrs. Margie Riley.

Refreshments were served by Mrs. Grover McCullin and Mrs. Darryl Proffitt.

Birthday

Dance For Gelnors

Jeffery and Jackie Gelnor were honored with a birthday dance Saturday, Oct. 16 at the Cameron Community Center. Hostesses for the occasion were their parents, Billy and Caroline Gelnor.

Fifty-three of their classmates attended and were served punch, chicken salad sandwiches, chips, dips, mints, and birthday cake.

A skit show was performed by some of the guests and Johnny Williams received the boy's prize and Theresa Mekush received the girl's prize.

Tea-Shower Honors Miss Hargrove

The parlor of the First Baptist Church of Rosebud was the setting Saturday afternoon, Oct. 16, for a tea-shower honoring Miss Margaret Hargrove, bride-elect of Billy Maresh.

The guests were welcomed by the honoree, her mother Mrs. Chandler Hargrove, Mrs. W. L. Maresh, and Mrs. Elgin Hensel.

The refreshment table was laid with a cutwork linen cloth and held an arrangement of fall flowers in a candelabra with lighted tapers. Punch, nuts, mints and cake squares decorated with rosebuds in autumn colors were served. Table appointments were of silver and crystal.

House party members included Mrs. Joe Marek, Mrs. David Mitchell, Mrs. Douglas Sonntag, Miss Linda Thrasher, and Mrs. Carson Wallace. Hostesses were Mmes. Julius Beinhauer, Earl Cook Jr., Judy Cunningham, Richard Ellison, A. T. Garrett, Thomas Glass, Elgin Hensel, Sam Jones, Richard Jones, Leo Kaler Jr., Willie Miller, David Mitchell, Luther Parks, Pat Peeler, Willie Scheffer, and Billie Stock.

The hostesses presented a round card table with matching chairs to the honoree as a gift.

Billy and Margaret will be married on Sunday afternoon, November 21 in the First Baptist Church of Rosebud.

Austin's Ninth Annual Artist Harvest Sale

The fall season is here again and with it comes Austin's ninth annual Artist Harvest, featuring the talents of more than 200 local artists and craftsmen, who will gather in Municipal Auditorium, November 6 and 7, to display and sell their wares.

Started in 1968, the Austin Arts & Crafts Fair is the largest community arts fair on the annual Highland Lakes Arts & Crafts Trail, which stretches for 240 miles in

Texas' beautiful Hill Country, featuring similar events in Marble Falls, Granite Shoals, Burnet, Buchanan Dam, Llano, and Kingsland. Each community's fair is limited to artists and craftsmen of its area and is staged by a volunteer committee of local residents.

The Austin Artist Harvest a project of the Austin Chamber of Commerce, is a two-day event held on the main floor and designated wings of the Municipal Auditorium.

Buckholts To Have Carnival

Buckholts School will hold its annual school carnival on Tuesday, Oct. 26, beginning at 6 p.m. in the school gymnasium.

The food booth will open at 6 p.m. and will feature chili along with sandwiches, chili dogs, desserts and drinks.

School classes and organizations will furnish games and entertainment beginning at 6:30 p.m. The carnival will close at 10 p.m.
